NZ Open Work Visa valid to Feb 2029

PROFESSIONAL SUMMARY

Analytics graduate who learns by building rather than just studying, from a live AI-powered booking platform to automation tools that cut manual reporting time by 70 percent. Background spans automotive engineering, data validation in regulated industries, and customer-facing roles across three countries, with a habit of picking up new tools fast and putting them to work on real problems.

SKILLS

- **Business Intelligence:** Power BI, Excel, Power Query, DAX
- **Data and Analytics:** SQL, Python, Root Cause Analysis, Customer Journey Analytics, Trend Analysis
- **Business Partnering:** Stakeholder Management, Influencing Leaders, KPI Reporting, Cross functional Collaboration
- **Operations and Agile:** Process Improvement, UAT, Data Quality Checks, APIs, AI Tools including GitHub Copilot and Claude

ANALYTICS PROJECTS

AI Agent for CV and Cover Letter Generation, Founder and Developer prateek02061997.github.io/Prateek-Portfolio

- Built a Telegram based AI agent using the Claude API to automatically generate tailored CVs and cover letters from job descriptions in seconds.
- Managed the full build to deployment pipeline independently, hosting the codebase on GitHub and deploying the application on Railway.

Kiwi Budget Tours, Founder and Insights Lead kiwibudgettours.com

- Built and deployed an AI driven tourism booking platform with a WhatsApp integrated AI planner, using Voice of Customer insights to shape the product.
- Used customer journey analytics and UAT to optimise conversion rates and refine user experience.

Fuel Prices and EV Demand in New Zealand, Master's Thesis prateek02061997.github.io/Prateek-Portfolio

- Conducted a 15 year panel analysis across NZ, Norway, China and the US, combined with a 103 respondent consumer survey and a 3 month real world EV ownership trial, to test perception versus reality gaps in EV adoption.
- Applied elasticity analysis, Granger causality and ARIMA forecasting, finding that policy instability suppresses EV adoption even when fuel prices remain high.

Generative AI Business Process Automation, AI Automation Analyst prateek02061997.github.io/Prateek-Portfolio

- Built multi step AI automation workflows using Claude and the OpenAI API to replace repetitive reporting and drafting tasks, achieving a 70 percent reduction in manual reporting time.
- Mapped business processes to identify high value AI intervention points while preserving human review checkpoints for sensitive outputs.

Gilmours Workflow Analysis and Process Redesign, Operational Analyst prateek02061997.github.io/Prateek-Portfolio

- Conducted stakeholder interviews with drivers, dispatchers and warehouse staff to map the end to end delivery process and quantify delays by stage.
- Produced a redesign case recommending dynamic route optimisation and automated dispatch scheduling, identifying a credible 20 percent delivery delay reduction opportunity.

Genesis Energy Supply Chain Analysis, Sustainability and Supply Chain Analyst prateek02061997.github.io/Prateek-Portfolio

- Analysed Genesis Energy's full supply chain across fuel procurement, generation, transmission and retail operations serving over 500,000 customers, identifying risks including gas shortages and coal export exposure.

PROFESSIONAL EXPERIENCE

Data Logician & Field Services Specialist, AA New Zealand

Apr 2026 to Present

- Analyse roadside telemetry and performance data to identify operational root causes and streamline service efficiency.
- Maintain high quality incident logs and automated data records to ensure reporting accuracy, metric consistency, and compliance.
- Partner with customers and internal operational teams to track performance drivers, protect service KPIs, and improve response outcomes.

Customer Insights Specialist, Uber Eats Process, Teleperformance

Jul 2022 to Dec 2023

- Led data analysis to identify root causes behind customer experience issues, service bottlenecks, and complaint trends across multiple channels.
- Generated weekly operational insight reports for leadership to simplify complexity, highlight dissatisfaction drivers, and prioritise business initiatives.
- Maintained knowledge base systems to support continuous process improvement and reduce reliance on manual reporting.

Customer Experience and Operations Specialist, Upstox

Apr 2021 to Apr 2022

- Analysed customer onboarding datasets and commercial performance metrics to map trends and isolate operational bottlenecks.
- Transformed fragmented customer feedback into structured, actionable insights to help product and operations teams maximise sales conversion.
- Managed day to day stakeholder communication to influence operational decisions and ensure initiatives delivered measurable business outcomes.

Data Associate, Wipro Limited

Oct 2019 to Mar 2021

- Validated large scale healthcare data structures using SQL and Power BI to eliminate reporting gaps and resolve metric inconsistencies.
- Executed regular UAT, data quality audits, and custom KPI reporting to improve reporting accuracy and visibility across senior teams.

EDUCATION

Master of Applied Business, Business Analytics, Unitec Institute of Technology, Auckland, 2024 to 2025

- Coursework focused on predictive modelling, business intelligence, digital transformation, and converting data into commercial business strategy.

Bachelor of Technology, Automobile Engineering, Rajasthan Technical University, India, 2015 to 2019

- Designed and built a solar powered vehicle as part of a team representing the university at a national engineering championship.

CERTIFICATIONS

- Agile Business Analysis
- Generative AI-Powered Strategic Business Analysis
- Power BI + Claude: AI-Powered Modeling with the MCP Connector

ADDITIONAL EXPERIENCE

- Security, contracted across major concerts including Coldplay, Ed Sheeran and Travis Scott, sporting and event day environments including cricket, rugby, football, horse racing, car racing and boat racing, film shoot sets, court security, and bank premises security, managing safety and access control across diverse public and controlled environments.
- Warehouse, Retail and Hospitality, worked as a Traffic Controller for Vector Energy directing vehicle and pedestrian movement on site, in hotel operations and campground management, in retail operations at Countdown, and in hospitality at Burger King since October 2024, balancing part time shift work with ongoing job search and study commitments.
