PROFESSIONAL SUMMARY

Commercially minded Business Operations and Systems Analyst with 4+ years of cross-functional experience optimizing service operations, workflow integrity, and customer-facing processes. Combines grounded operational problem-solving with practical hands-on capability in applied AI tools, low-code automation, and modern digital workflows to bridge operational friction and turn ideas into action.

SKILLS & COMPETENCIES

AI & Automation: Claude & OpenAI APIs (hands-on, production deployment) | AI Agents | Google Antigravity | GitHub Copilot | VS Code | Microsoft Power Automate (working knowledge) | Prompt Engineering (applied) | REST APIs & Webhooks (applied) | MCP (working knowledge)

Data Engineering & Analytics: SQL (industry-use level) | Power BI (working proficiency) | Python (industry-use level) | ETL/ELT | Power Query | DAX | Snowflake | Telemetry Diagnostics & Anomaly Detection (applied)

Business Analysis & Delivery: Process Mapping (applied) | UAT & Root Cause Analysis (applied) | Requirements Gathering | Agile Environments | Client Engagement | Process Improvement

Systems & Collaboration: GitHub | Railway | Vercel | MS Office (Excel, Word, PowerPoint) | Cross-Functional Collaboration | Independent Delivery

PROFESSIONAL EXPERIENCE

Business & Field Operations (SDC) | AA Motoring, Auckland **Apr 2026 – Present**

- Assist AA members during urgent vehicle breakdown and roadside assistance situations, assessing service needs, communicating status clearly, and coordinating prompt dispatch resolution.
- Utilize the internal Field Service application to enter, update, and maintain member service records, incident logs, battery replacement records, and battery warranty documentation.
- Review field dispatch workflows and service records to verify that warranty data, member notes, and operational logs are accurate, complete, and SLA-compliant.

Digital Transformation & Project Support | iTech24, Auckland **Dec 2025 – Present**

- Support digital transition projects for small-to-medium business clients, evaluating existing manual office workflows to identify opportunities for digital adoption and efficiency gains.
- Assist with business requirements gathering, user journey reviews, and functional testing (UAT) across client web applications to ensure solutions meet agreed operational needs.
- Prepare clear process documentation, user guides, and testing notes to assist non-technical client teams during handover and implementation.

Business Operations Analyst | Uber **Jul 2022 – Dec 2023**

- Investigated and managed customer support cases for Uber Eats, diagnosing root issues such as missing or undelivered orders and identifying appropriate resolutions.
- Reviewed order, menu, and transactional records to determine and authorize suitable customer refunds, account credits, and policy-aligned adjustments.
- Maintained service levels while handling customer queries, documenting case histories, and resolving operational dispute escalations efficiently.

Product Operations & Process Analyst | Upstox **Apr 2021 – Apr 2022**

- Supported prospective customers through the Demat account-opening process, explaining regulatory requirements and assisting them through each onboarding stage.
- Assisted customers with KYC identity verification and actively resolved system and documentation issues affecting account opening and activation.
- Followed up with customers during onboarding to address outstanding verification issues and support successful completion of the process.

Data Quality & Operations Associate | Wipro **Oct 2019 – Mar 2021**

- Processed high-volume back-office requests within a US healthcare insurance process, including new policy creation, policy date changes, term updates, and policy servicing.
- Reviewed policy and customer information to process billing changes, calculate updated premium amounts, and complete requests according to established procedures.
- Maintained accuracy, turnaround times, quality standards, and required documentation while processing high-volume operational requests.

EDUCATION

Master of Applied Business (Business Analytics) | Unitec Institute of Technology, Auckland **2024 – 2025**

- Completed advanced coursework in business intelligence, operational analytics, predictive modeling, database design, and quantitative decision-making.
- Conducted applied industry research evaluating New Zealand supply chain distribution networks, transport pricing, and fleet logistics workflows.

Bachelor of Technology (Automobile Engineering) | Rajasthan Technical University, India **2015 – 2019**

- Co-engineered and fabricated an electric solar vehicle for the Electric Solar Vehicle Championship (ESVC) and manufactured a track go-kart for the National Go-Kart Championship.
- Applied first-principles engineering problem-solving, structural stress analysis, circuit testing, and technical documentation to complex mechanical systems.

AI & TECHNICAL WORKSHOPS

AWS Auckland Well-Architected User Group: Generative AI & Product Architecture — **AWS Office, PwC Tower Auckland**
Attended practical talks on turning ideas into cloud-deployed products (featuring Datacom) and managing GenAI token cost optimization to avoid budget blowouts.

AI-Assisted Development: From Idea to Pull Request — **The Auckland iOS Meetup (The Good Home, Mt Eden)**
Explored coding agents (Claude, GitHub Copilot, Cursor), context mapping, automated AI code reviews, and CI testing guardrails.

n8n Meetup Auckland: Low-Code Automation & Workflow Integration — **Local n8n Community (AWS Office, PwC Tower)**
Participated in hands-on sessions covering practical low-code workflow automation, event-driven webhooks, and real-world system integrations using n8n.

Copilot Dev Days: GitHub Copilot CLI & App Workshop — **Aotearoa NZ GitHub User Group (Microsoft Auckland)**
Hands-on workshop exploring autonomous coding agents, developer workflow automation using Copilot CLI, and modern development practices.

From Security Firefights to Coding Agents: Copilot CLI & Dynamics 365 Architecture — **Microsoft Auckland**
Explored enterprise transformation scenarios, Copilot CLI terminal automation, Dataverse integration, and role-based security governance.

Building AI Agents with OpenAI in Snowflake & Hands-on Labs — **Snowflake Virtual Hands-on Lab**
Completed online hands-on lab sessions prototyping conversational agents utilizing OpenAI models and Snowflake Cortex for automated document and data querying.

AKL Multi-Model Copilot, Autonomous Agents & Token ROI — **Microsoft Auckland**
Participated in technical lab sessions covering prompt engineering, multi-model evaluation, autonomous agent workflows, and enterprise token governance.

PROFESSIONAL CERTIFICATIONS

- **Microsoft Certified: AI Developer Associate** — Microsoft
- **Microsoft Azure AI Essentials Professional Certificate** — Microsoft & LinkedIn
- **Generative AI-Powered Strategic Business Analysis** — LinkedIn & PMI
- **Agile Business Analysis** — LinkedIn & PMI
- **Power BI + Claude: AI-Powered Modeling with MCP Connector** — LinkedIn
- **Building AI Agents with Snowflake** — LinkedIn
- **Introduction to Gen AI with Snowflake** — LinkedIn
- **Intro to Snowflake for Devs, Data Scientists, Data Engineers** — LinkedIn
- **Building Generative AI Apps to Talk to Your Data** — LinkedIn

FEATURED TECHNICAL & AI BUILDS (INDEPENDENT PROJECTS)

Kiwi Budget Tours — Digital Booking & AI Solution
kiwibudgettours.com
- Built an end-to-end travel booking platform to assist independent travellers in New Zealand with fragmented transport pricing, provider schedules, and itinerary options.
- Developed an automated WhatsApp-based AI assistant using structured prompt engineering and API connections to tourism datasets, delivering real-time route options without manual intervention.
- Conducted prompt testing, edge-case validation, and user journey reviews to improve booking flow reliability and conversational response quality.

Personal Portfolio & Interactive AI Chatbot (Gemini API & FastAPI)
prateek02061997.github.io/portfolio2
- Built and deployed a personal portfolio platform on GitHub Pages presenting professional experience, technical skills, analytics projects, and background.
- Integrated a Gemini-powered interactive chatbot capable of answering user inquiries regarding professional experience, skills, projects, and portfolio details.
- Developed a Python backend hosted on Render with a controlled knowledge base, prompt guardrails, and CORS integration to ensure consistent, grounded responses.

AI CV & Cover Letter Generator — Telegram Application
prateek02061997.github.io/portfolio2/projects/ai-cv-assistant/index.html
- Built and deployed a Telegram-based AI application that accepts a LinkedIn job URL or pasted job description and generates tailored CV and cover-letter content.
- Integrated Claude API, Railway, and Telegram webhooks to automate job-description analysis, skill-gap mapping, and document generation.
- Designed structured prompts and schema-validated generation logic to maintain consistent formatting while producing ATS-friendly application materials.

Technologies: Claude API, Telegram Bot API, Railway, Webhooks, REST APIs, Prompt Engineering, Structured Outputs

AI Business Intelligence Copilot
prateek02061997.github.io/portfolio2/projects/ai-bi-copilot/index.html
- Developed an AI-powered analytics application that allows business stakeholders to ask natural-language questions about datasets and receive instant analytical insights.
- Implemented automated data profiling, cleaning, SQL query generation, Plotly data visualization, and transactional anomaly/variance analysis.
- Designed the architecture to support executive reporting and operational decision-making through automated data interpretation and presentation-ready summaries.

Gilmours Distribution Workflow Analysis & Process Redesign
prateek02061997.github.io/portfolio2
- Analyzed wholesale consumer goods delivery workflows across drivers, dispatchers, and warehouse personnel using route manifests and dispatch timestamps to identify delays.
- Evaluated order fulfillment turnaround times and transport schedule variance using process mapping and operational data analysis.
- Formulated recommendations for an automated scheduling and digital manifest handoff workflow projected to reduce operational transit delays by 20%.

New Zealand EV Adoption, Fuel Elasticity & Policy Modeling
prateek02061997.github.io/portfolio2/projects/ev-fuel-price-thesis/index.html
- Analyzed 15 years of panel data (2010–2024) across NZ, Norway, China, and the US using log-log regression and Granger causality to evaluate consumer sensitivity to fuel price spikes.
- Conducted a 103-consumer primary survey and 3,512 km Nissan Leaf field trial, quantifying NZ's EV fuel price elasticity (5.939 uncontrolled / 0.590 controlled) and post-Clean Car Discount demand drops.
- Modeled total cost of ownership impacts from Road User Charges ($76/1,000km) and proposed a 7-step revenue-neutral roadmap targeting 700k EVs and a 48% (10.3 Mt) transport CO2 reduction by 2030.

ADDITIONAL OPERATIONAL EXPERIENCE

Retail & Supply Operations: Stock replenishment and inventory staging at Woolworths NZ via Sidekicker; bulk order picking at Pure Life; site traffic safety at Vector Energy.
Event Operations: Crowd coordination and venue safety operations across Go Media Stadium, Eden Park, Spark Arena and Auckland Council sites.
