Top Skills

Digital Transformation
Workflow Automation
Large-Scale Data Validation

Certifications

Agile Business Analysis
Generative AI-Powered Strategic Business Analysis
Power BI + Claude: AI-Powered Modeling with the MCP Connector
Intro to Snowflake for Devs, Data Scientists, Data Engineers
Introduction to Gen AI with Snowflake

Prateek Parihar

AI & Data Operations Analyst | Business Intelligence & Process Improvement | AI & Digital Transformation | Product Operations & UAT

Auckland, Auckland, New Zealand

Summary

I work at the intersection of business operations, data, and AI, turning operational challenges into practical systems, insights, and process improvements.My approach starts with understanding how a business actually works, mapping processes, identifying bottlenecks, analysing data, and working with stakeholders to define what needs to improve. I then translate those requirements into practical solutions, whether that means a BI dashboard, a data workflow, an automated process, or an AI enabled system.My experience spans Business Intelligence, operational analytics, process improvement, product operations, data quality, UAT, and AI automation. I have worked with operational datasets, built decision support solutions, automated repetitive workflows, validated data and reporting outputs, and developed AI powered applications that connect business processes with modern technology.I particularly enjoy solving problems where data is fragmented, processes are manual, or teams lack clear visibility into what is happening. I focus on creating solutions that are useful in day to day operations, not technology for its own sake.What I bring to teamsBusiness & Process AnalysisUnderstanding requirements, mapping workflows, identifying gaps, performing root cause analysis, and translating business problems into practical solutions.Business Intelligence & DataTurning complex and fragmented data into reliable reporting, dashboards, operational insights, and decision support outputs.AI & AutomationDesigning practical AI workflows and automations that reduce repetitive work, connect disconnected systems, and improve operational efficiency.Systems & DeliveryWorking across business and technical teams through UAT, data validation, implementation, troubleshooting, and continuous process improvement.I’m particularly interested in roles where business, data, technology, and AI come together, including Business Intelligence, Data Analytics, Business Analysis,

AI Operations, Product Operations, and Technology and Systems roles.

Experience

AA New Zealand
SDC | Business & Field Operations
April 2026 - Present (7 months)
Auckland, New Zealand

Monitor operational telemetry and diagnostic data across field equipment to isolate fault patterns and expedite asset issue resolution.
Maintain standardized logging frameworks and real-time operational documentation to ensure continuous data integrity across service units.
Synthesize technical diagnostic logs into actionable operational insights for cross-functional engineering and customer-facing teams.

iTech24
Digital Transformation & Project Support
December 2025 - Present (11 months)

• Support digital transformation initiatives by reviewing manual business workflows and identifying opportunities for digital adoption and process improvement.• Assist with requirements gathering, user journey reviews, and user acceptance testing (UAT) for client-facing web applications.• Prepare process documentation, user guides, and testing notes to support implementation and handover.• Work with client teams to validate functional requirements and ensure digital solutions align with operational needs.

Kiwi Budget Tours
Lead Solutions Architect & Digital Transformation
October 2025 - Present (1 year 1 month)
Auckland, New Zealand

Built the digital booking platform from scratch, turning manual trip coordination into an automated self-service system.
Integrated multiple LLM APIs (Claude, Gemini, Grok, OpenAI) to run conversational chat agents that handle traveler queries, summarize route options, and complete real-time bookings.
Executed User Acceptance Testing (UAT) and analyzed user onboarding journeys to identify friction points and improve conversion rates.

Uber

Business Operations Analyst
July 2022 - December 2023 (1 year 6 months)

Audited service delivery platform logs and interaction datasets to identify operational bottlenecks and recurring issue trends.
Built automated operational trend summaries and KPI reports to provide leadership with visibility into service delivery gaps.
Standardized internal knowledge management systems and SOPs, reducing resolution turnaround times and eliminating manual handoff redundancies.

Upstox
Product Operations & Process Analyst
April 2021 - April 2022 (1 year 1 month)
Mumbai, Maharashtra, India

Monitored transaction telemetry and user onboarding funnels in a high-volume FinTech environment to identify platform drop-off points.
Structured unstructured customer escalations and feedback into prioritized backlogs for product and engineering sprints.
Maintained core user retention metrics by establishing data-driven communication, monitoring, and automated escalation frameworks.

Wipro
Data Quality & Operations Associate
October 2019 - March 2021 (1 year 6 months)
Mumbai, Maharashtra, India

Executed large-scale data quality verification and audit checks across US healthcare datasets to ensure strict compliance and data integrity.
Conducted anomaly detection, data validation, and regular operational quality reporting across cross-functional platforms.
Performed UAT audits on data delivery pipelines to maintain metric consistency before reporting into executive systems.

Education

Unitec
Master of Applied Business, Business Analytics · (July 2024 - December 2025)

Arya College of Engg. & Information Technology, Jaipur
BTech - Bachelor of Technology, Automobile/Automotive Mechanics Technology · (2015 - 2019)
