PROFESSIONAL SUMMARY

Commercially minded Business Operations and Systems Analyst with 4+ years of cross-functional experience optimizing service operations, workflow integrity, and customer-facing processes. Combines grounded operational problem-solving with practical hands-on capability in applied AI tools, low-code automation, and modern digital workflows to bridge operational friction and turn ideas into action.

SKILLS & COMPETENCIES

Service Desk & Technical Support: Ticket Triage & Categorization | Incident Management (ITIL) | First-Contact Resolution (FCR) | Escalation Workflows | Hardware/Software Diagnostics | Network & Outage Troubleshooting | Alert Monitoring | SLA Compliance

Customer Care & Communication: Client Support (Chat, Phone & Email) | Active Listening & Empathy | Driver & User Technical Troubleshooting | Login & Portal Diagnostics | Non-Technical Guidance | Detailed Case & Resolution Notes

Web & Technical Tools: HTML | REST APIs & Webhooks (applied) | Claude & OpenAI APIs | AI Agents | Google Antigravity | GitHub Copilot | VS Code | Prompt Engineering (applied) | MCP (working knowledge)

Systems & Platforms: Ticketing & Service Management Systems | Field Service Applications | GitHub | Railway | Vercel | MS Office (Excel, Word, PowerPoint) | 24/7 & After-Hours Flexibility

JOB SIMULATION CERTIFICATIONS

Partnering with AI in the Workplace Job Simulation | Datacom (Forage) — **Oct 2026**

- Partnered with Generative AI tools (ChatGPT) to research, design, and draft client-ready technical reports, UI feature proposals, and visual storytelling presentations.
- Applied structured prompt engineering to diagnose and resolve website code issues, guiding AI through iterative debugging and functional validation.

Service Desk Job Simulation | Datacom (Forage) — **Oct 2026**

- Practiced IT support and incident management aligned with ITIL processes, categorizing, logging, and escalating service tickets in a managed services environment.
- Diagnosed a complex network outage scenario, assessing impact across client tickets and drafting clear, empathetic escalation updates for affected users.

PROFESSIONAL EXPERIENCE

Business & Field Operations (SDC) | AA Motoring, Auckland — **Apr 2026 – Present**

- Assist AA members during urgent vehicle breakdown and roadside assistance situations, assessing service needs, communicating status clearly, and coordinating prompt dispatch resolution.
- Utilize the internal Field Service application to enter, update, and maintain member service records, incident logs, battery replacement records, and battery warranty documentation.
- Review field dispatch workflows and service records to verify that warranty data, member notes, and operational logs are accurate, complete, and SLA-compliant.

Digital Transformation & Project Support | iTech24, Auckland — **Dec 2025 – Present**

- Support digital transition projects for small-to-medium business clients, evaluating existing manual office workflows to identify opportunities for digital adoption and efficiency gains.
- Assist with business requirements gathering, user journey reviews, and functional testing (UAT) across client web applications to ensure solutions meet agreed operational needs.
- Prepare clear process documentation, user guides, and testing notes to assist non-technical client teams during handover and implementation.

Business Operations Analyst | Uber — **Jul 2022 – Dec 2023**

- Investigated and managed customer and partner support cases for Uber Eats, diagnosing root issues such as missing orders, dispatch exceptions, and operational disputes.
- Communicated directly via chat with drivers to identify and troubleshoot issues faced during app login, account authentication, navigation errors, and workflow disruptions.
- Reviewed order histories and transactional records to authorize policy-aligned adjustments, maintaining strict SLA turnaround while logging thorough case and resolution notes.

Product Operations & Process Analyst | Upstox — **Apr 2021 – Apr 2022**

- Supported prospective customers through the Demat account-opening process, explaining regulatory requirements and assisting them through each onboarding stage.
- Troubleshot user login failures, portal errors, and system exceptions during KYC document submission and intermediate account-creation steps to resolve technical bottlenecks.
- Followed up with customers during onboarding to address outstanding verification issues, guide document re-submissions, and ensure successful account completion and activation.

Data Quality & Operations Associate | Wipro — **Oct 2019 – Mar 2021**

- Processed incoming service tickets within a US healthcare insurance workflow, examining policy records, verifying requests, and executing necessary policy modifications and servicing tasks.
- Executed policy alterations including term date adjustments, policyholder updates, and billing changes while accurately calculating and updating required premium amounts.
- Logged detailed operational notes specifying incoming user requests, diagnostic actions taken, and final resolutions to ensure 100% audit compliance and strict SLA adherence.

EDUCATION

Master of Applied Business (Business Analytics) | Unitec Institute of Technology, Auckland — **2024 – 2025**

- Completed advanced coursework in business intelligence, operational analytics, predictive modeling, database design, and quantitative decision-making.
- Conducted applied industry research evaluating New Zealand supply chain distribution networks, transport pricing, and fleet logistics workflows.

Bachelor of Technology (Automobile Engineering) | Arya College of Engineering & IT, India — **2015 – 2019**

- Co-engineered and fabricated an electric solar vehicle for ESVC and manufactured a track go-kart for the National Go-Kart Championship.
- Applied first-principles engineering problem-solving, structural stress analysis, circuit testing, and technical documentation to complex mechanical systems.

AI & TECHNICAL WORKSHOPS

AWS Auckland Well-Architected User Group: Generative AI & Product Architecture — **AWS Office, PwC Tower Auckland**
Attended practical talks on turning ideas into cloud-deployed products (featuring Datacom) and managing GenAI token cost optimization to avoid budget blowouts.

AI-Assisted Development: From Idea to Pull Request — **The Auckland iOS Meetup (The Good Home, Mt Eden)**
Explored coding agents (Claude, GitHub Copilot, Cursor), context mapping, automated AI code reviews, and CI testing guardrails.

n8n Meetup Auckland: Low-Code Automation & Workflow Integration — **Local n8n Community (AWS Office, PwC Tower)**
Participated in hands-on sessions covering practical low-code workflow automation, event-driven webhooks, and real-world system integrations using n8n.

Copilot Dev Days: GitHub Copilot CLI & App Workshop — **Aotearoa NZ GitHub User Group (Microsoft Auckland)**
Hands-on workshop exploring autonomous coding agents, developer workflow automation using Copilot CLI, and modern development practices.

From Security Firefights to Coding Agents: Copilot CLI & Dynamics 365 Architecture — **Microsoft Auckland**
Explored enterprise transformation scenarios, Copilot CLI terminal automation, Dataverse integration, and role-based security governance.

Building AI Agents with OpenAI in Snowflake & Hands-on Labs — **Snowflake Virtual Hands-on Lab**
Completed online hands-on lab sessions prototyping conversational agents utilizing OpenAI models and Snowflake Cortex for automated document and data querying.

AKL Multi-Model Copilot, Autonomous Agents & Token ROI — **Microsoft Auckland**
Participated in technical lab sessions covering prompt engineering, multi-model evaluation, autonomous agent workflows, and enterprise token governance.

PROFESSIONAL CERTIFICATIONS

- **Microsoft Certified: AI Developer Associate** — Microsoft
- **Microsoft Azure AI Essentials Professional Certificate** — Microsoft & LinkedIn
- **Generative AI-Powered Strategic Business Analysis** — LinkedIn & PMI
- **Agile Business Analysis** — LinkedIn & PMI
- **Power BI + Claude: AI-Powered Modeling with MCP Connector** — LinkedIn
- **Building AI Agents with Snowflake** — LinkedIn
- **Introduction to Gen AI with Snowflake** — LinkedIn
- **Intro to Snowflake for Devs, Data Scientists, Data Engineers** — LinkedIn
- **Building Generative AI Apps to Talk to Your Data** — LinkedIn

FEATURED TECHNICAL & AI BUILDS (INDEPENDENT PROJECTS)

Kiwi Budget Tours — Digital Booking & AI Solution
kiwibudgettours.com
- Built an end-to-end travel booking platform to assist independent travellers in New Zealand with fragmented transport pricing and itinerary options.
- Developed an automated WhatsApp-based AI assistant using prompt engineering and API connections to tourism datasets, delivering real-time route options.

Personal Portfolio & Interactive AI Chatbot (Gemini API & FastAPI)
prateek02061997.github.io/portfolio2
- Built and deployed a personal portfolio platform on GitHub Pages presenting professional experience, technical skills, and analytics projects.
- Integrated a Gemini-powered chatbot with a Python/FastAPI backend on Render and a controlled knowledge base to deliver accurate, grounded responses.

Creative Nails & Heena by Nidhi — Digital Service & Booking Platform
prateek02061997.github.io/creative_hands_by_nidhi/
- Designed and built a mobile-responsive beauty services platform using Google AI Studio and Google Antigravity, streamlining client inquiries and bookings.
- Implemented interactive service catalogs, mobile appointment inquiry flows, and client review showcases, improving local digital discovery in Auckland.

The Pragati Journal — Digital Editorial & Research Publication Platform
prateek02061997.github.io/thepragatijournal/
- Developed an editorial content and research showcase platform using Google AI Studio and Google Antigravity for an independent journalist and researcher.
- Structured multi-category investigative articles, publication archives, and responsive long-form reading typography with optimized static site performance.

AI CV & Cover Letter Generator — Telegram Application
prateek02061997.github.io/portfolio2/projects/ai-cv-assistant/index.html
- Built a Telegram-based AI tool that parses LinkedIn job URLs or pasted descriptions to generate tailored, ATS-friendly CV and cover letter drafts.
- Connected Claude API, Railway, and Telegram webhooks using structured JSON schema prompts to produce consistent, high-accuracy document outputs.

AI Business Intelligence Copilot
prateek02061997.github.io/portfolio2/projects/ai-bi-copilot/index.html
- Developed an analytics app allowing business users to ask natural-language questions about datasets and receive instant SQL queries and visual insights.
- Implemented automated data profiling, cleaning, Plotly visualizations, and anomaly detection to support rapid operational decision-making.

Gilmours Distribution Workflow Analysis & Process Redesign
prateek02061997.github.io/portfolio2
- Analyzed wholesale FMCG delivery workflows across dispatchers and warehouse teams using route manifests to diagnose delivery turnaround delays.
- Formulated recommendations for automated dispatch scheduling and digital manifest handoffs projected to reduce transit delays by 20%.

New Zealand EV Adoption, Fuel Elasticity & Policy Modeling
prateek02061997.github.io/portfolio2/projects/ev-fuel-price-thesis/index.html
- Analyzed 15 years of panel data and conducted a 3,512 km Nissan Leaf field trial to evaluate EV price elasticity and total cost of ownership impacts.
- Modeled RUC cost structures and proposed a 7-step revenue-neutral roadmap targeting 700k EVs and a 48% transport CO_2 reduction by 2030.

ADDITIONAL OPERATIONAL EXPERIENCE

Manufacturing & Inventory Operations: Quality checking, packaging, and assembly floor operations at Sistema Plastics factory; stock replenishment and inventory staging at Woolworths NZ via Sidekicker; bulk picking at Pure Life.

Event & Venue Operations: Crowd coordination, access control, and venue safety operations across high-profile sports and major public events including rally car racing, boat racing, international rugby, football, and cricket matches across Go Media Stadium, Eden Park, and Spark Arena.
